Boy Talk Q&A

Designed For: **Males - Grades 6 to 9**

Males in early adolescence go through profound physical and psychological changes. Yet at a time when boys most need the guidance of a trusted adult, they often find themselves growing more isolated from the knowledgeable, approachable people who could provide that guidance.

In this workshop, boys will have the opportunity to ask a male HiTops educator all of the questions they have about sex, sexuality, relationships, and "growing up." Questions are answered in a factual and age-appropriate manner. The depth in which topics are covered depends on the maturity and comfort level of the boys.

Our goals are to help young males:

- Correctly identify male and female anatomy and physiology
- Become more comfortable asking questions and gaining answers about sex and sexuality
- Learn the facts about contraception including abstinence, STIs and HIV, sexual orientation, and factor in creating a healthy relationship
- Understand that knowledge is the key to healthy decision-making

Average Length of Program: **45-60 minutes**

Recommended Number of Participants: **4 - 10**

Cost of Program: **Contact Us**
